PROFILE

Aspiring Software Developer with experience in developing web-based solutions and APIs. Passionate about creating user-focused applications and continuously improving through learning and collaboration.

EDUCATION

Master of computer Applications

Marian college kuttikanam Autonomous 2024-2026

CGPA:7.5

Bachelor of computer Applications

Marian college kuttikanam Autonomous 2021-2024

CGPA:6.3

Higher Secondary Education

St.joseph Hss peruvanthanam,idukki 2019-2021

86%

Secondary Education

St.Antony's High school mundakayam ,idukki 2018-2019

99%

SKILLS

Languages

Python, Java, C++, PHP, JavaScript,Dart

Frameworks/Libraries

Django, Flask (basic),React.js,Mern

Tools & Technologies

Git ,MySQL, Excel ,RPA

Platforms/Cloud Services

GitHub, Render, AWS, Azure

Soft Skills

Team collaboration, Problem-solving, Analytical Thinking

ACADEMIC PROJECTS

Used Products E-commerce Website

- Developed a dynamic web application for buying and selling used products as part of an academic project.
- **Technologies:** Php, MySQL, HTML, CSS, JavaScript

EV Charger Locator Web App

- Built a web application using React and Django to help EV users locate and book nearby charging stations.
- **Technologies:** React, JavaScript, Django, Firebase

Vocal sight- Ai Assitant

- A Flutter application focuses on guiding visually impaired users in their daily activities using voice commands.
- **Technologies:** Flutter, Dart, Speech-to-Text API, Text-to-Speech, Firebase/SQLite, and Accessibility APIs.

Machine Learning Projects

- Implemented five machine learning models (Regression and Logistic Regression,KNN) for prediction and classification tasks.
- Applied hyperparameter tuning and data visualization (Matplotlib, Seaborn) to improve insights and model accuracy.
- Technologies: Python, Scikit-learn, Pandas

IoT – Smart Home Motion Detection System

- Developed an IoT-based home security system that detects human motion and instantly sends an alert message to the user's Telegram account.
- Utilized Arduino Uno, PIR sensor, and IoT integration for real-time motion detection and notification

RPA-based Placement Monitoring System

- automate the selection and registration process by sending emails and messages to eligible candidates based on predefined criteria.

Professional Experience

11/2025 – 02/2026	Full stack Developer Intern <i>At L-VelUp Edulab (online)</i> Developed real world projects Tenet data systems,StanzaFlex
12/2025 – 03/2026	Python django developer intern <i>At Mahatma Gandhi University Innovation Foundation (onsite)</i> Developed real world projects campuzine ,MGUIF websites

CERTIFICATIONS

04/2023 – 04/2023	Microsoft office specialist in excel <i>Microsoft</i>
	NPTEL Certification for Python for Data Science
